## LOVELL

Tribute to A. A. Stearns

The town of Lovell was saddened last week by the sudden death of one of its esteemed citizens, Adelbert Ames Stearns, lovingly known among his friends and neighbors as "A. A."

He came from a much honored and highly respected family, being the son of the late Joshua Heald Stearns and Sarah Russell Stearns.

He was born in Lovell and lived here all his life, being almost 53 years old at the date of his death.

He was a genial friend and kind neighbor, always ready to lend a helping hand in time of trouble.

A good index of his character was his love for his family, his love for children, his love for horses, and his love of a joke, even on himself.

He was a Mason, being a member of Delta Lodge No. 153, Delta Chapter O. E. S. No. 128, of Lovell, Royal Arch Chapter, Bridgeport Council and Ark Mariners, Norway.

We believe he patterned the course of his life like a true Mason, squaring his conduct by the principles of morality and brotherly love, and limiting his desires in every station of life. He certainly was respected and liked.

The funeral was held at the home of G. W. Walker, attended by Rev. Clifford V. Cross, who spoke words of comfort to the sorrowing relatives and friends. List of flowers:

Instead of serving a three course luncheon at this party, Mrs. Kimball surprised the members by serving a most delicious supper. The hostess was showered with compliments for having given one of the most entertaining parties of the season.

It has been suggested that hereafter when the hostess provides such a full course supper that the members have difficulty in returning to their respective homes, that the members of the club arrange to make it an all night party and to return after breakfast the following morning.

The next party in the spring series will be held at the home of Mrs. R. C. Stanford at Number Four on the last Thursday of the month.

## Niagara "Kolo" Dusting Materials

The New Dusts you can see Stick give more permanent protection from each application

These "Kolo" Dusting Materials have sticking properties not found in any other dusting material. They may be applied with equal effect to either wet or dry foliage, and after once "set," will stick for weeks throughout rain and wind. This dust is a visible sticker. You can see it plainly without lens or microscope. Experiments demonstrate that this sticker dust retains a larger percentage of sulphur on the leaf surface for a longer period than is the case of "Lime Sulphur" Solution, or most any other liquid spraying material.

## Lesson for April 8

### THE RESURRECTION OF JESUS CHRIST (EASTER LESSON)

LESSON TEXT—Mark 16:1-20. GOLDEN TEXT—Because I live ye shall live also.

PRIMARY TOPIC—Jesus Comes to Life Again. JUNIOR TOPIC—Christ Rises from the Grave. INTERMEDIATE AND SENIOR TOPIC—Jesus, Our Living Lord. YOUNG PEOPLE AND ADULT TOPIC—The Power of the Resurrection.

1. The Ministry of Love (vv. 1-4). 1. By whom (v. 1). Mary Magdalene, the mother of James and Salome. They brought sweet spices with which to anoint Him. 2. When? (v. 2). Early in the morning of the first day of the week. 3. Their perplexity (vv. 3, 4). They questioned as to who should roll away the large stone from the mouth of the tomb. To their surprise they found the stone removed.

II. The Angel in the Tomb (vv. 5-8). Jesus knew that these women would come to the sepulcher with perplexed and unbelieving hearts so He had an angel waiting there to announce to them the fact of His resurrection. Note the angel's message:

1. "Be not afraid" (v. 6). 2. "Ye seek Jesus of Nazareth who was crucified" (v. 6). This threefold designation with marvelous clearness shows (1) His humanity—Jesus. (2) Lowly residence—Nazareth. (3) Ignominious death—crucified.

3. "He is risen; He is not here. Behold the place where they laid Him" (v. 6). These words throw light upon His birth, humility and shameful death. He who was born in lowly circumstances and suffered the shameful death on the cross, is now the conqueror of death. His resurrection gives meaning to His death. "If Christ be not risen your faith is vain, ye are yet in your sins" (1 Cor. 15:17).

4. "Go your way, tell His disciples and Peter" (v. 7). As soon as it was known that Christ was risen from the dead they were to tell it to the disciples. The disciples all needed this blessed news, but Peter especially, since he had utterly denied Him. 5. "He goeth before you into Galilee, there shall ye see Him" (v. 7). Christ had told the disciples that He would rise from the dead and meet them in Galilee, but their unbelief kept them from this blessed truth.

III. The Appearance of the Risen Christ (vv. 9-14). These appearances had as their object the restoration of the disciples from their awful failure and discouragement and convincing them without a peradventure of a doubt of Christ's resurrection. Since His resurrection was to be the central theme of apostolic preaching, it was necessary that they have a certainty of knowledge as to this matter (Acts 1:3). Without the resurrection of Christ His death would be meaningless. Out of the tomb more appearances. Mark selects three.

1. To Mary Magdalene (v. 9-11). Mary's heart responded to the Savior who had graciously delivered her from demons. Her sufferings were no doubt terrible. She was first at the tomb; her devotion was amply rewarded by being first to meet the risen Lord. Though her faith was weak she went at once and told the story to the disciples.

2. To two disciples on the way to Emmaus (vv. 12, 13). Luke gives full particulars concerning this appearance (Luke 24:13-25). Jesus had appeared and eaten with them. 3. The eleven disciples (v. 14). Christ appeared to them while sitting at meat and wine and they for their unbelief. The fact that they steadfastly resisted the testimony that Christ had risen, and yet afterward were willing to risk their lives in the proclamation of this truth proves the genuineness of their faith.

IV. The Commission of the Risen Lord (vv. 15-19). After the disciples were convinced of the truth of His resurrection, Christ sent them forth to "preach the gospel to every creature." What a glorious and supreme task! What a blessed issue to those who believe and how awful to them that do not. "He that believeth and is baptized shall be saved, but he that believeth not shall be damned" (v. 16). V. The Activity of the Enthroned Christ (vv. 19, 20). After giving the disciples their commission He ascended on high and from the unseen sphere directed their activities. Wherever they went He confirmed their word. He does the same for His disciples today.

**Our Thoughts**  
We should manage our thoughts as shepherds do their flocks in making a garden; first, select the choicest, and then dispose them in the most proper places, that every one may reflect a part of its color and brightness on the next.—Samuel Taylor Coleridge.

**The Presence of God**  
Man is more blessed or less blessed in the same measure as he is aware of the presence of God.—John Tauler.

## Top-Working to McIntosh

By Wilson M. Morse, Waterford

It is part of the Farm Bureau program of work for the coming season to get many apple trees of the more profitable kinds. This, I think, should consist of grafting McIntosh on to the old trees of varieties which do not pay well. There are good sound trunks and main limbs, and if he is interested enough in apples to just the common sense thing to top-work them. It takes only three or four years after grafting to commence getting paying crops.

Some will say that they think it better to blow out the old trees and start all new trees. But this requires at least twice as long to commence getting apples, much longer than this to get crops of much size. Also the expense of top-work is much less than that of grafting.

One common mistake in grafting is to graft the scions too high from the ground. Remember that scions grow fast for the first few years and are pretty sure to follow in to set scions higher from the ground than a man can reach. To decide to what variety to graft. Much is said about the "New England Seven." These are all good apples. But in this part of Maine I think we should heed the list we have all and forget the others until we have all of them. Then we can pick. Even if we knew that soon the price of McIntosh would be no higher than the price of the other good varieties, it is a good idea to graft McIntosh on to other good varieties to still make it this most promising.

First, among these, it is one of the best apples grown. Second, and very important to us, it grows its best here. Vermont and New Hampshire can grow as good McIntosh as we do but in other sections they do not get the color and fine 'finish' we do here.

Third, the tree itself, everything considered, is the most desirable of any of the leading varieties. It is hardy, does not win in this respect. The lateral limbs grow to it strongly so that it has a strong frame work. It does not have the weak Fourth, due to its almost annual bearing, nearly, if not quite, as cheap as any variety.

Fifth, McIntosh trees do well on land that any kind of apple tree will grow on, in fact, do well on land usually considered too wet for apples.

It seems to me that when we have found a leading product in so important a field as apples which we can grow to its very perfection, that we are missing our opportunity to make a good living from our farms if we do not have a McIntosh orchard on nearly every farm in this section of Maine. I believe that this part of the state can well become as famous for McIntosh apples as Aroostook is for potatoes. We should raise train loads of them instead of a few carloads. Some say in some places, but over-production is where we can produce the best. There is always room at the top. Top-work to McIntosh!

## Memory History of America

From 'Chris' Columbus to 'Cal' Coolidge  
Historical Events in Ninety and Nine Chapters—More or Less

In the olden days, it was the general belief that the world was shaped like a disc. This impression was accepted as correct, by the wise men of the day and by the people at large, and it remained for a young Italian to explode this theory and to conclusively prove to the world (with the exception of Zion City) that the earth was round like an orange. Columbus, on his axis, had poles, besides those in Warsaw and around Hanover Street, in Boston.

This young Italian was none other than Christopher Columbus, a poor but worthy native of Genoa, who spent many moments reading current literature, and we are led to believe that his favorite dime novels were the marvelous adventures of Marcus Polo, noted traveler of the day. No doubt most of the natives regarded these stories as "bunk," but young Christopher pored over them and re-read that thrilling paragraph until he was dizzy, until his head swam, and here perhaps he formed his first opinion that the world went round and round.

Columbus tried to convince his friends in Italy that by sailing westward, he could reach India, establish commercial relations and perhaps fly the flag of Italy over a grand line of ocean tramps, but his friends would do nothing except yawn, shake their heads, or tap their foreheads significantly and murmur, "Nolite home." If Mussolini had been at the helm, perhaps he would have gained recognition, but the black shirers were in the minority and there was nothing left for Columbus but to vent his way sorrowfully to Spain, where he had been receiving letters frequently from the Spanish prisoner. Learning that the Spanish prisoner was only a myth and, after leaving his complaint with the postal authorities, Columbus tried to horn in at the Court of Spain. He had an egg trick that went over big, until he tried it on a group of grandees with a watermelon, prodigious, which nearly spoiled three thunders, namely: his clothes; 2nd, the grandees' position; and 3rd, his chances of reaching the gate for an audience with the king.

But one day as the diplomats were as

It was a false alarm, Helen Decker did not have the mumps for all her parents were hoping she might.

Mr. and Mrs. Merrill Savin of Albany were guests of their daughter, Mrs. Marion Kimball this week. When they returned home they took Ethel and Edna Kimball with them for a visit.

Several boys and girls from our section attended the Boys' and Girls' Conference at the Community House at Waterford on Saturday. Those attending were Frances and Thelma McAllister, and Miss Ada Curtis, the girls' leader; Ralph Robbins, Lillian Brown, Donald Bell, Donald Kimball and Paul Sanborn. Mrs. Bessie McAllister took them to the Flat. All reported a fine day.

Mr. and Mrs. Herman Holt of North Waterford have recently visited Mrs. Riggs, his aunt, also Mr. and Mrs. Pearl Bradbury were dinner guests there, recently.

Mrs. Jennie Haynes returned to the home of her son, Harry N. Haynes, on Sunday, March 18th. She has come for the summer. C. D. Tarbox, her son-in-law, brought her up here.

Another delicious supper was served on Wednesday night to a large crowd of the supper committee. "Lord Jim" by Joseph Conrad was read. The supper was to like the ending of the picture but the lesson taught was of the best.

Church School will be held on Saturday as school was in charge of Sisters Merrill and Lewis Merrill is having with Mrs. Mariet Brown. Has been cutting some good for Harry Haynes.

## Memory History of America

From "Chris" Columbus to "Cal" Coolidge  
Historical Events in Ninety and Nine  
Chapters—More or Less

—

In the olden days, it was the general

belief that the world was shaped like a

disc, and the wise men of the day

taught the people at large, and it re-

garded for a young Italian to explore

the world and to conclusively prove to

the world that the earth was round like an

orange, and that it was not a flat

disc, but a globe, was a great feat. This

young Italian was none other than

Cristopher Columbus, a poor but worthy

native of Genoa, who had spent many idle

hours in reading current literature, and

was led to believe that his favorite

genre was the marvelous adventures

of Marco Polo, noted traveler of the

day. No doubt most of the populace

regarded these stories as "bunk," but

young Christopher pored over them and

read each thrilling paragraph until he

was weary, until his head swam, and here

he would be forced his first opinion that

the world was round and round.

(Columbus tried to convince his friends

in Italy that by sailing westward, he

could reach India, establish commercial

relations and perhaps fly the flag of Italy

over a grand line of ocean tramps, but

his friends would do nothing except

shake their heads, or tap their fore-

heads significantly and mutter, "Nobody

knows." If Mussolini had been at the

time, perhaps he would have gained recog-

nition for the Italian shippers were in the

fact there was nothing left for

Columbus but to read his way sorrowful-

ly to sea, where he had been receiving

letters from the Spanish prison-

ers, learning that the Spanish prisoners

were a myth and after leaving his

country with the postal authorities,

Columbus tried to horn in at the Court

of Spain. He had an egg trick that went

well, and he tried it on a group of

nobles with a water glass product,

and people scooped three things, nam-

ely, gold, silver, and the Holy Spirit. His

trick was so good, his chances of crashing

before an audience with the king.

The story of the diplomats were as

sembled, the band started playing "Hail  
Columbia," and Columbus, thinking this  
tribute was meant for him, sailed brave-  
ly past the courtiers and guards, and re-  
sponded with "Hail, Hail, the Gang's  
All Here." This gained him instant  
recognition.

However, the statement of his mission

did not make very much impression upon

the king, but, Queen Isabella, who was

not averse to an occasional sporting pro-

position, agreed to finance an expedition,

Columbus was overjoyed but his joy was

short lived when the contents of the

queen's mesh bag only produced a lip-

stick and a key to the palace. But the

queen bestowed heretofore of a wrist watch,

which she had received from a mail order

house, and several other trinkets which

had gone into the royal discard, from

which combination she received a goodly

sum from the local hock-shop, and suffi-

cient to equip three vessels to be placed at

the disposal of Columbus.

Columbus sailed westward from Spain

with a happy heart, but his crew got a

bad case of cold feet when they were a

few days at sea and implored their com-

mander to turn back or at least to send

out an S. O. S. Columbus told them flat-

ly, there was nothing doing, following

Horace Greeley's advice of "Go west,

young man, for the future is there. The

crew, becoming more and more alarmed, formed

a plan, and threatened to mutiny, disturb-

ing the peace aboard ship and the

commander of Columbus (This is the

first disturbance on record of the clan

and nights of Columbus).

Finally, after about everybody had

given up hope except Christopher himself,

land was sighted and the flag of Spain

was planted upon one of the Bahama

Islands (near enough to the Bermudas to

prove that Columbus knew his onions).

The natives who were encountered were

called Indians, as the explorers firmly be-

lieved that they had discovered a part of

India. This nickname to the Ameri-

can aborigines has remained until the

present day.

Columbus never knew that he discovered

the American continent, but he did es-

tablish a record for sailing west across

the Atlantic. What he lacked most was

a good press agent.

If he had been accorded the publicity

which attended Linbergh, he might not

have died neglected, and brokenhearted,

a victim of jealousy.—C. R. M.
